

database.ServerDatabaseTest.test
_client_exists

```
graph LR; A[database.ServerDatabaseTest.test_client_exists] --> B[database.get_email]; A --> C[database.get_name];
```

The diagram illustrates a test method, `database.ServerDatabaseTest.test_client_exists`, which is shown in a grey box on the left. Two blue arrows originate from the right side of this box and point to two separate white boxes on the right. The top arrow points to a box containing `database.get_email`, and the bottom arrow points to a box containing `database.get_name`. This visualizes the test method's interaction with the database's `get_email` and `get_name` methods.

database.get_email

database.get_name
