

core.utils.PaymentGate.get
_balance

core.server.server.make
_transaction

core.utils.daily_limit

```
graph LR; A[core.utils.PaymentGate.get_balance] --> C[core.utils.daily_limit]; B[core.server.server.make_transaction] --> C;
```

The diagram illustrates a dependency or data flow. On the left, there are two rectangular boxes. The top box contains the text 'core.utils.PaymentGate.get_balance' and the bottom box contains 'core.server.server.make_transaction'. On the right, there is a shaded rectangular box containing the text 'core.utils.daily_limit'. Two blue arrows originate from the right side of the left boxes and point towards the left side of the shaded box, indicating that both functions on the left depend on or interact with the 'daily_limit' variable.
